

ROOF CERTIFICATION

## ROOF CERTIFICATION

Roof certifications entail many different aspects of the roofing system before government forms are filled out and submitted, but not only that. The certifying contractor then becomes liable for repairs or corrections of the roof systems should failure occur.

Roof certifications are not for the weak hearted! Only (1) home inspection firm in Northeast Ohio is certified for this type of work. You can't even find a roofing contractor who will certify their own work.

So, why do you need this service? Because FHA/VA, lenders, and mortgage companies require it.

DC Home Inspection Service is FHA/VA and State of Ohio approved. We also supply the government forms and insurance papers needed to complete the certification on the spot.
